

LedPro™

Powerful Red Light Therapy combined with Near-Infrared, Vibration technology and Nogier soundwaves.

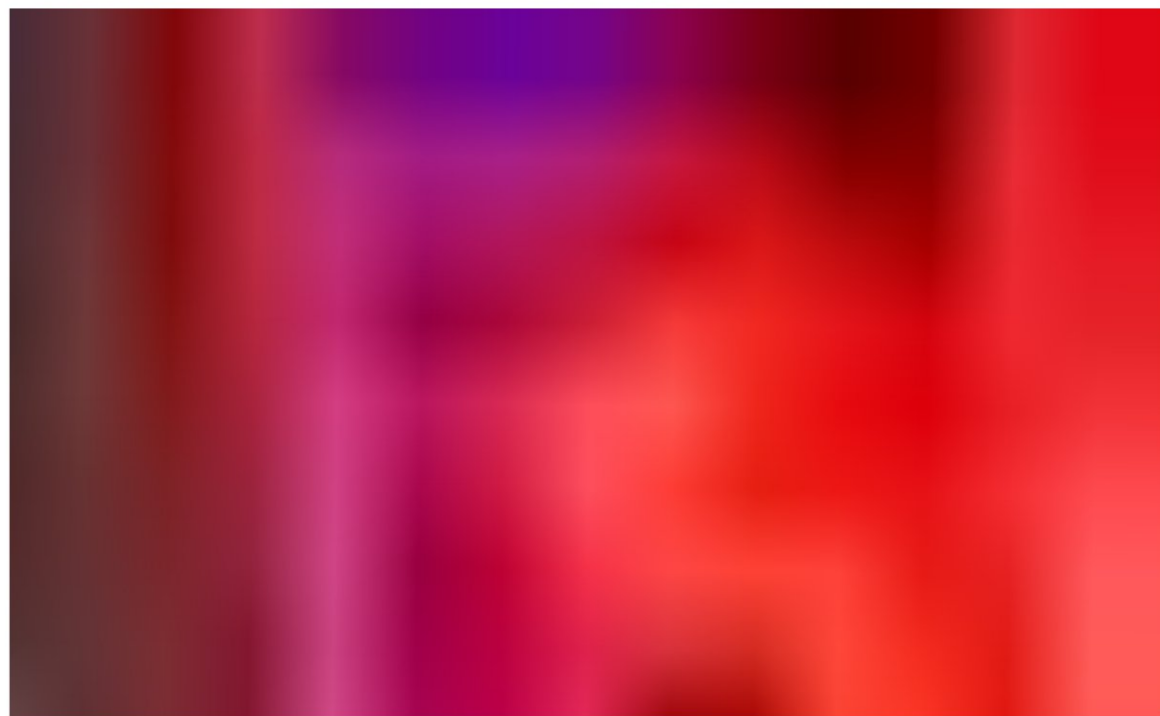

INTRODUCTION

WHAT IS LedPro?

Introducing LedPro™ by CTN, now available in a vertical standing version. This next-generation device delivers the same proven **red and near-infrared light therapy** as bed versions, but now redesigned for a space-saving upright format and more advanced features.

Built for modern wellness studios and professional environments, the vertical LedPro™ blends **photobiomodulation, vibration therapy, and Nogier sound frequencies** to offer a complete recovery and rejuvenation experience — all while standing comfortably.

LedPro™ Vertical combines advanced technology, elegant design, and user-friendly automation for a professional, holistic wellness solution.

Key Features:

1

Vertical, Space-Efficient Full-Body Coverage: Standing design delivers uniform red & near-infrared exposure from head to toe while reducing floor footprint and improving session throughput.

2

Multi-Modal Therapy (Light + Vibration + Nogier): Combines photobiomodulation with an integrated vibration platform and Nogier sound waves to enhance relaxation, circulation, and overall treatment synergy.

3

Intuitive Pro Controls & Media: LCD touchscreen with adjustable session lengths, plus a 24" Full HD monitor for guided programs, branding, or education—ideal for professional environments.

4

Powerful & Comfortable Performance: 420 Red LEDs + 420 NIR LEDs (840 + 840 total) with dual AC radial fans for client cooling, delivering consistent intensity across the body in efficient sessions.

HOW IT WORKS?

RED LIGHT THERAPY

› The CTN LedPro™ Vertical utilizes red and near-infrared (NIR) light in short, efficient sessions. Each treatment panel includes 420 Red LEDs and 420 NIR LEDs (total 840 + 840 light points) delivering a dual wavelength spectrum:

› Red light (633–660 nm) supports skin health, energy production (ATP), and collagen renewal.

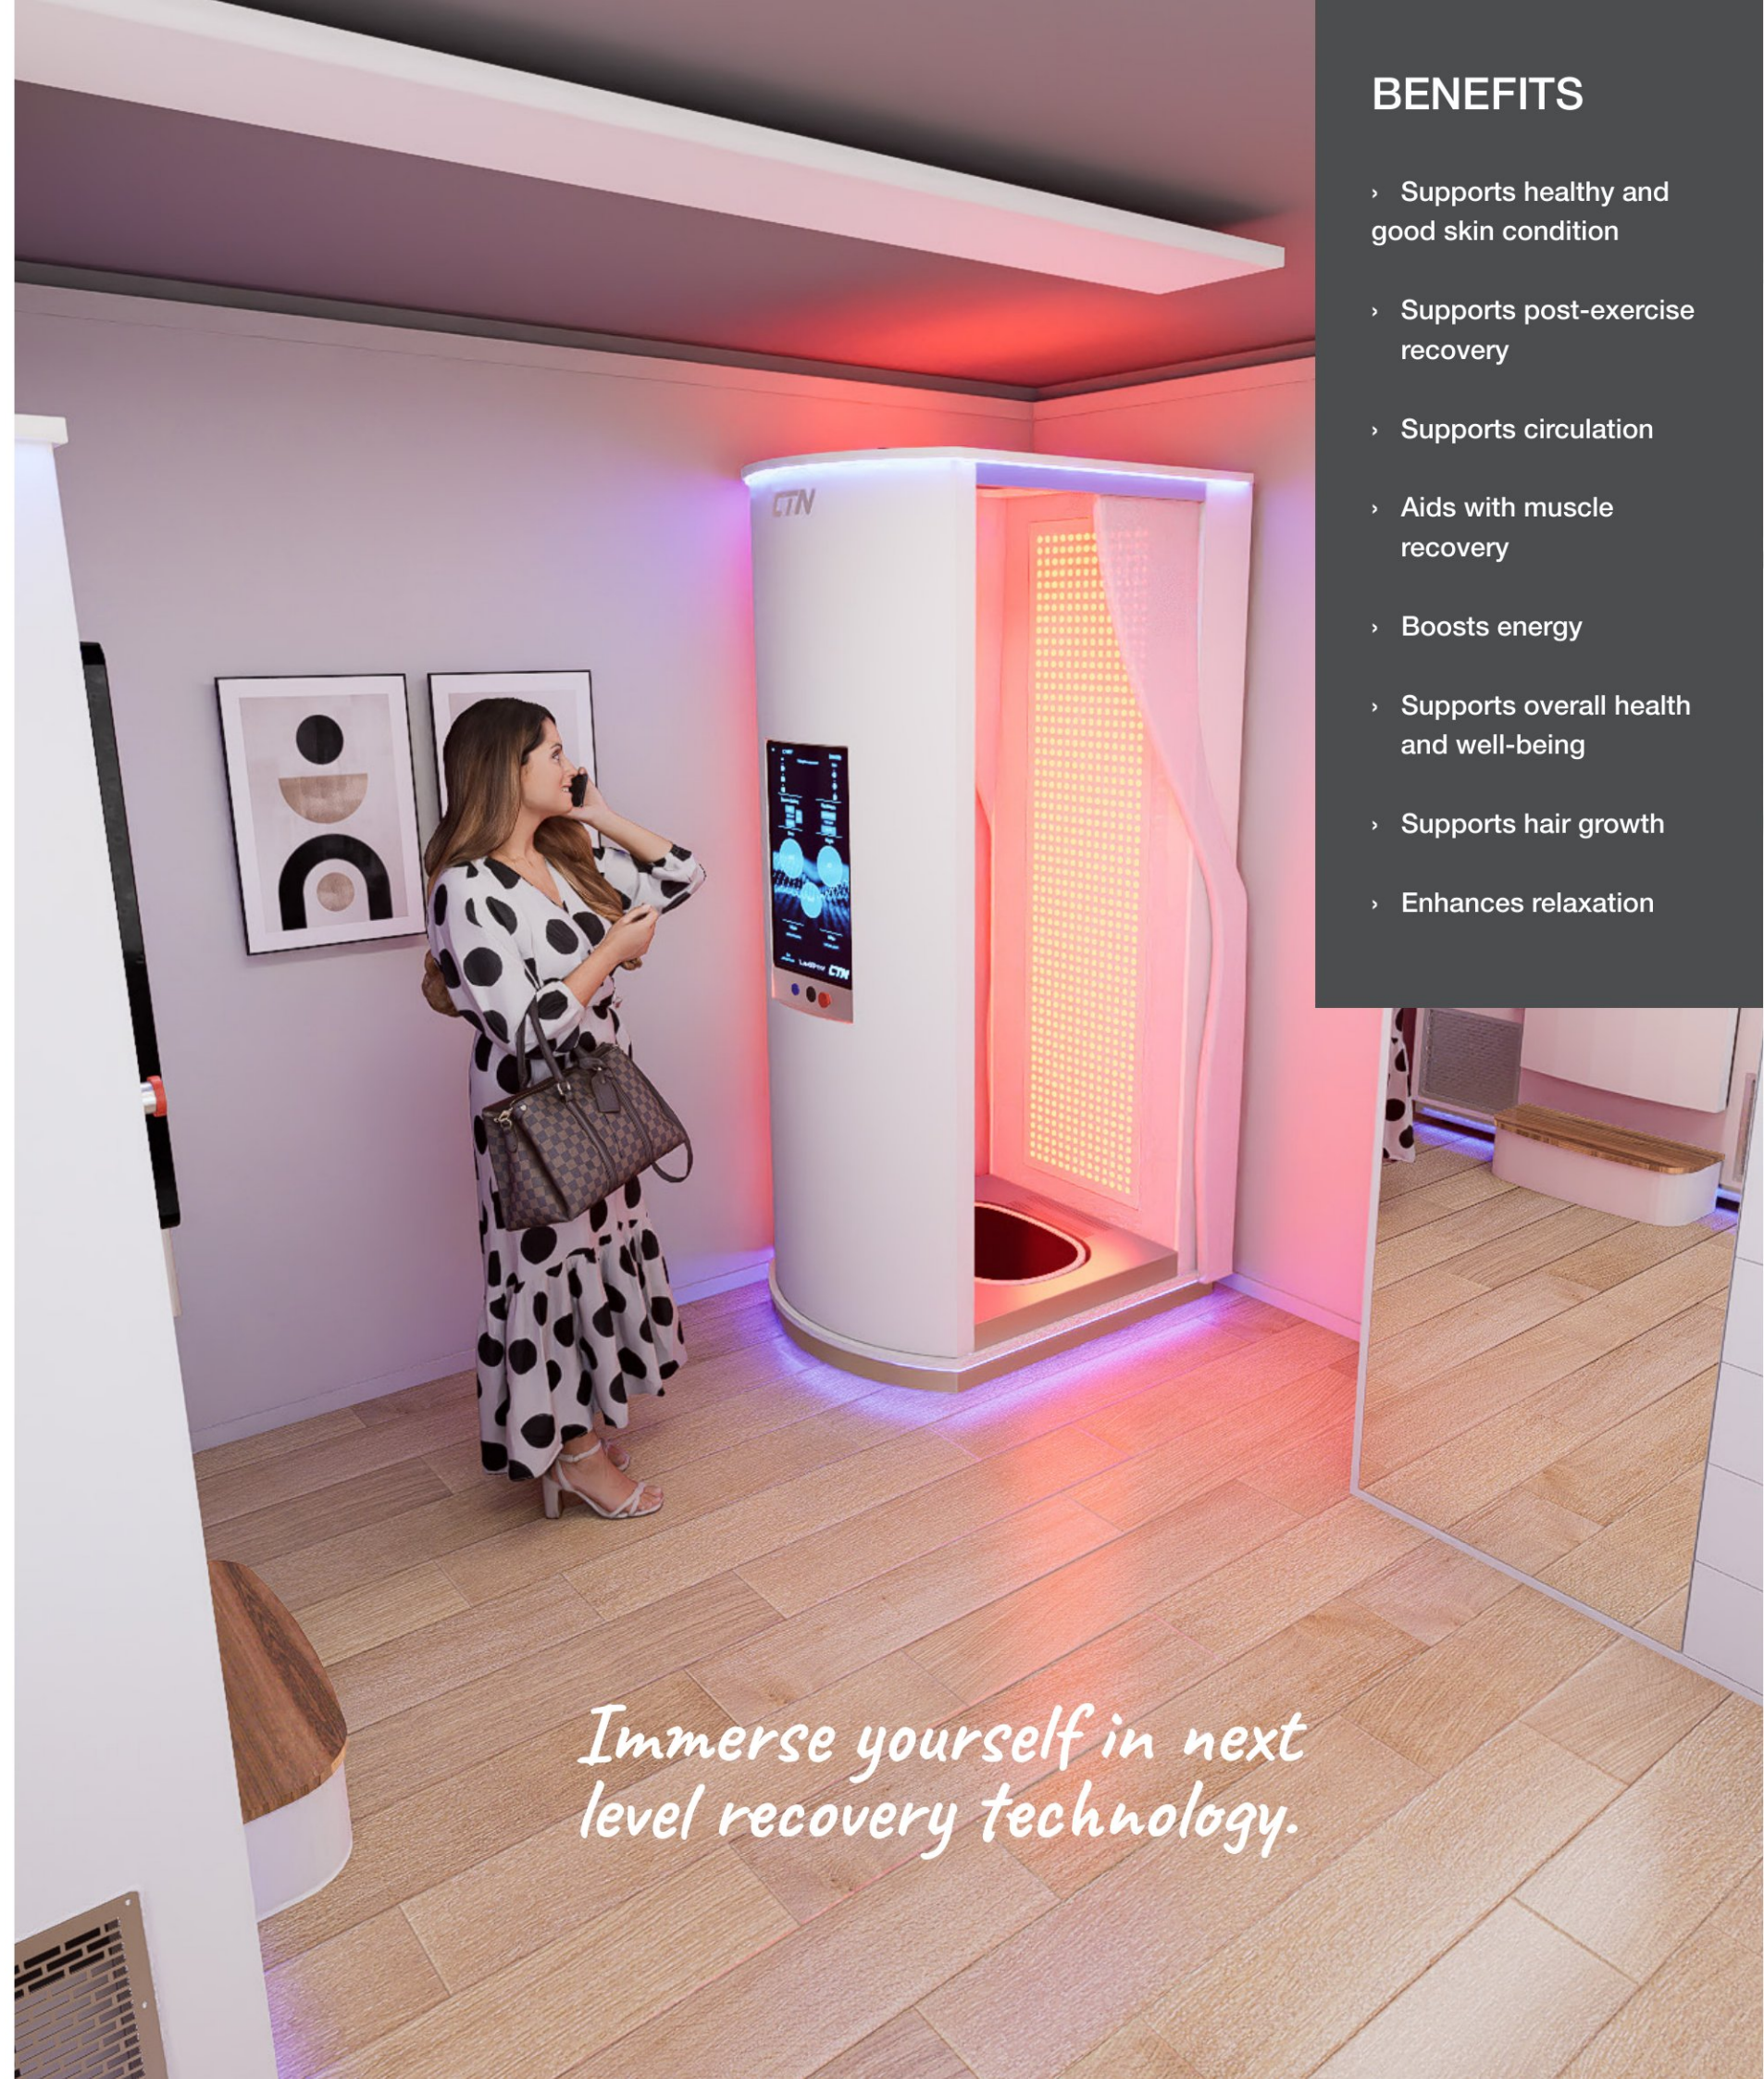

› NIR light (850–940 nm) penetrates deeper tissues, enhancing muscle recovery, circulation, and cellular repair.

› Additionally, the integrated **vibration platform** gently stimulates muscles and circulation, improving oxygenation and lymphatic flow while reducing stiffness and fatigue. This mechanical activation enhances the absorption of red and near-infrared light, supporting faster recovery and overall vitality.

› **Nogier sound waves** introduce low-frequency resonant tones that help balance the nervous system and deepen relaxation. Together, vibration and sound create a multi-sensory environment that complements light therapy for optimal recovery, balance, and well-being.

BENEFITS

- › Supports healthy and good skin condition
- › Supports post-exercise recovery
- › Supports circulation
- › Aids with muscle recovery
- › Boosts energy
- › Supports overall health and well-being
- › Supports hair growth
- › Enhances relaxation

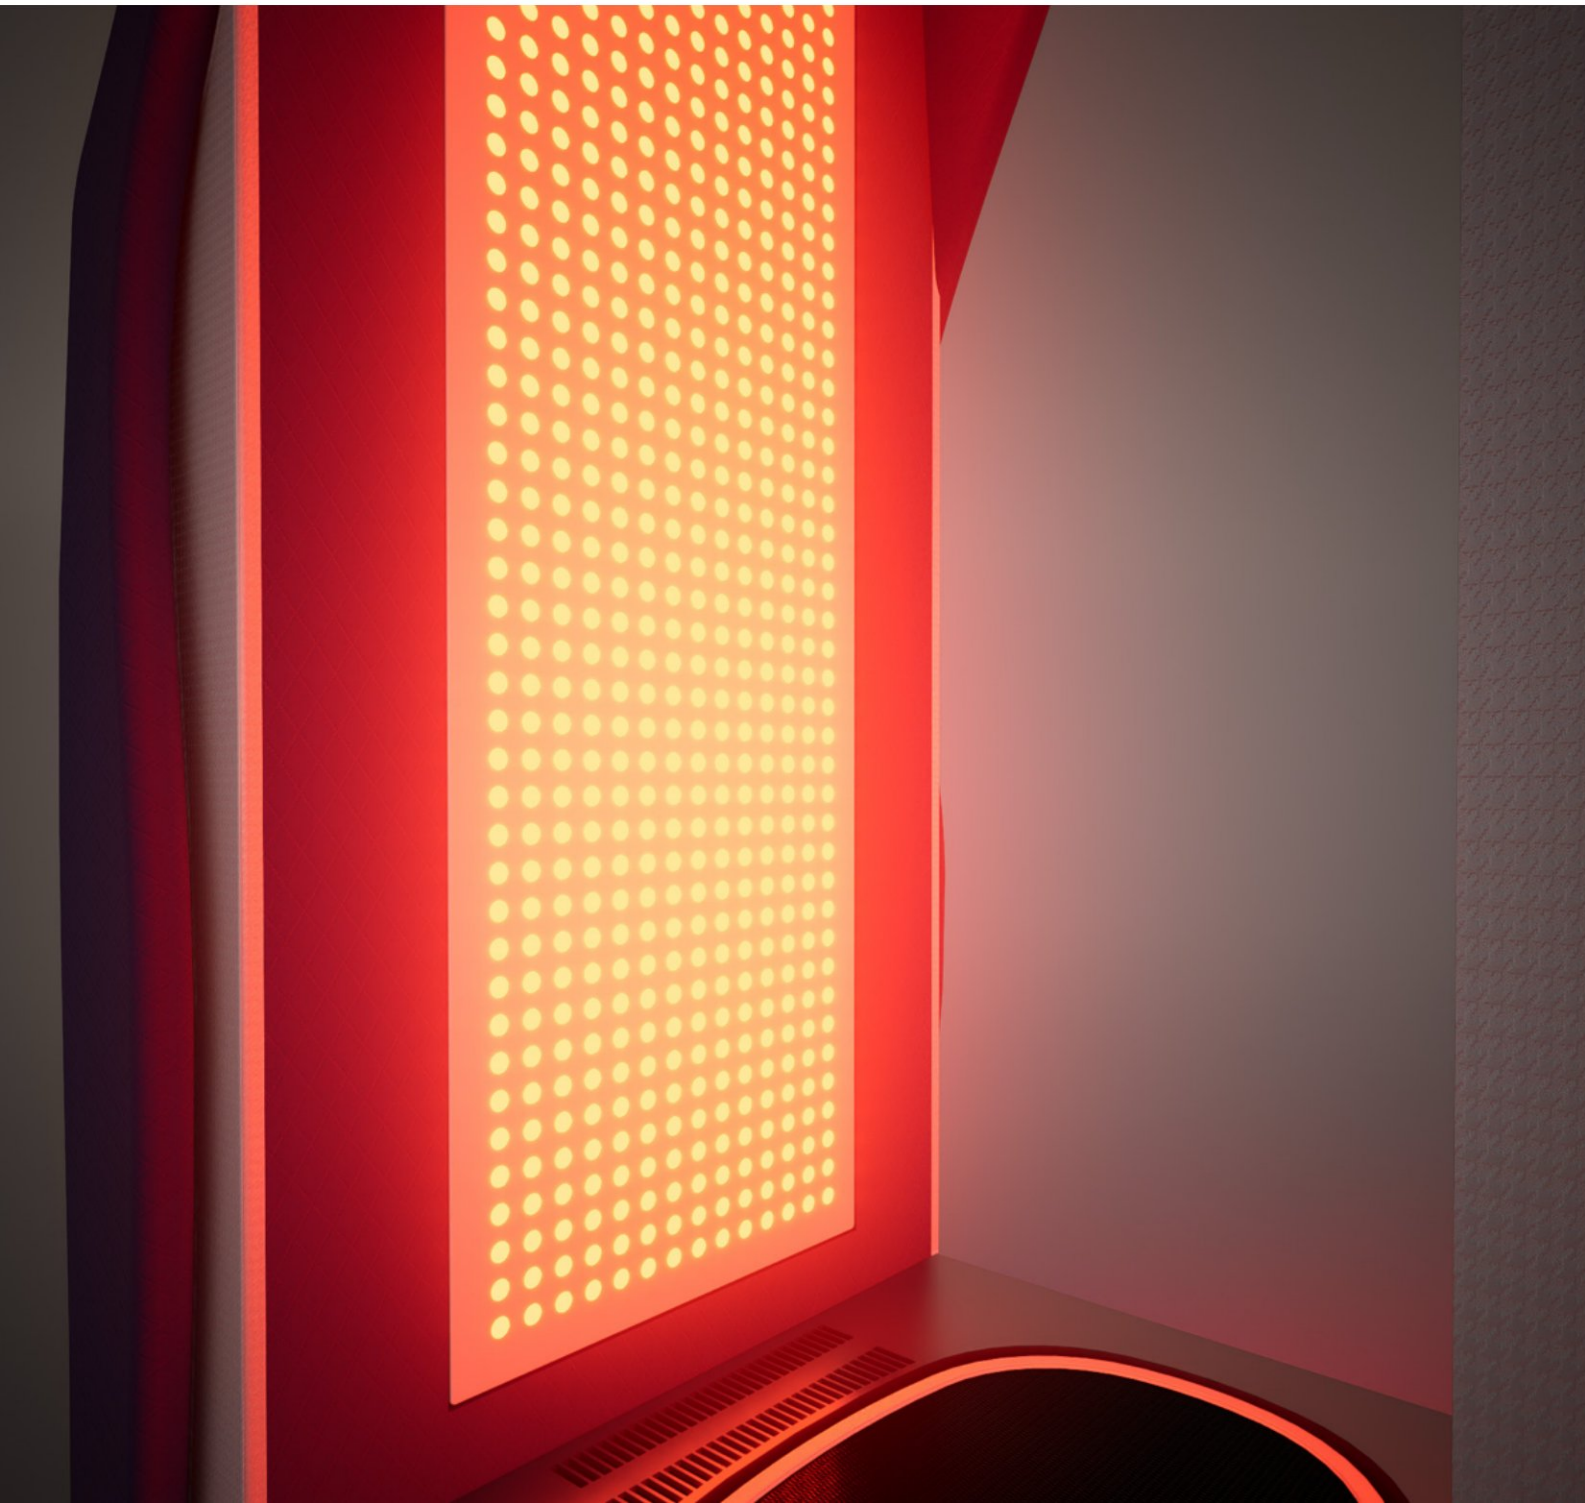

Immerse yourself in next level recovery technology.

PERFORMANCE & DESIGN

LedPro™ Vertical features a sleek, standing structure built with CTN's hallmark quality and precision. Its user interface includes an LCD touchscreen for intuitive control and a 24" Full HD monitor for guided sessions or media display.

Dual AC radial fans provide powerful client cooling for comfortable use even during intensive light sessions. Compact and ergonomic, the vertical LedPro™ fits seamlessly into any recovery or wellness space.

Technical Specifications:

Function:	Vertical Red light & Near infrared therapy
Manufacturer:	CTN
Total number of LEDs:	840 + 840
User interface & Display:	24" Full HD Monitor / LCD touchscreen
Cooling system:	Dual AC Radial Fans
Voltage:	230V / 50hz
Current (amp):	16A
Total power:	3000 W
Device dimensions:	224 (H) × 86 (W) × 120 (D) cm
Device weight:	250 kg
Shipping weight:	350 kg
Packed dimensions:	250 × 96 × 130 cm
Light frequencies:	Red 633 nm – 660 nm / NIR 850 nm – 940 nm

ABOUT CTN & PRODUCT FAMILY

CTN stands at the forefront of high-tech wellness, designing and manufacturing advanced recovery devices for professionals worldwide. We provide comprehensive installation, training, and ongoing support to ensure safe and effective use. The CTN device family empowers wellness experts with solutions that simplify work, enhance client satisfaction, and drive business growth through innovation and technology.

X°CRYO™

Localised cryotherapy device specifically designed to be used in targeted cooling of the skin, joints and muscles anywhere around the body.

e°CABIN™

Electrically powered and fully automated whole body cryotherapy cabin for supporting overall recovery and well-being.

X-TONE™

Magnetic Muscle stimulation (MMS) device expertly crafted for targeted strengthening and recovery, ideal for enhancing muscle wellness throughout the body.

OxyPro™

Hyperbaric oxygen chamber designed to support oxygen absorption, and help restore your body back to optimal health and function. Several different models available.
